

Hi there and thank you for taking the time to complete a code challenge with dott.
Good luck and we hope you will find it interesting!

Guidelines & Requirements:

- Commit your code to a Git repo we can access
- Please make sure to complete the challenge in 72 hours.
- Written in Swift
- Use the architecture of your choice (MVP/MVVM/MVC)
- Write code with testability in mind
- You are free to use any framework if necessary

Task

- Use the FourSquare API to display the restaurants around your current location on the map
 - Bonus: Load more restaurants by panning on the map
- Include a restaurant detail page
